 (FOR KEY SEE REVERSE)

1. Research in the production of titanium is carried on in the Institute for Research for Industrial Metals, Fehérvári s. 130, Budapest II. The work is under the direction of Professor Laszlo Gillemot, who seems to have large funds at his disposal. The aim of the research is to produce titanium commercially. Until now only small quantities of a titan-metal compound, red cross, have been produced in this laboratory.
